

KUNAL SHARMA

AI-Assisted Application Developer

kunalsharma9321@gmail.com
+91 8554012234
Nagpur, Maharashtra, India

PROFILE

AI-assisted application developer focused on building practical, production-oriented web, API, Android, and automation applications. Experienced with AI-driven development workflows for implementation, debugging, rapid iteration, and product delivery, with hands-on projects covering frontend development, backend APIs, authentication, rate limiting, and security-focused application design.

PROJECT EXPERIENCE

NEXORA API SECURITY LAB

Project

Full-Stack Security Platform • React 18 / Vite / TypeScript / Vercel Serverless / Vercel KV

- Built a full-stack API security laboratory with frontend and backend components for practical security testing and demonstrations.
- Implemented reusable rate-limiting middleware, API-key authentication, protected routes, environment configuration, health checks, metrics, demo endpoints, and logging.
- Structured the application around maintainable components and reusable backend middleware rather than a single-purpose prototype.

DOCly

Project

Document & AI Q&A Application • Web Project

- Developed a document-focused application concept for interacting with PDF/text content through an AI-assisted question-and-answer workflow.
- Focused on a simple user experience for turning uploaded content into an interactive knowledge interface.

SAVORA

Project

WebUtilityApplication • Frontend Project

- Built a practical web utility with a streamlined user workflow and responsive interface.
- Developed as part of a growing portfolio of real-world web applications and product experiments.

PROFESSIONAL SKILLS

- | | | |
|---------------------------|-----------------------|-----------------------------|
| • AI-Assisted Development | • Backend Development | • Git / GitHub |
| • Frontend Development | • Node.js / Express | • Python |
| • React / Vite | • TypeScript | • Kotlin / Android |
| • HTML / CSS | • REST APIs | • Jetpack Compose |
| • JavaScript | • API Authentication | • Ollama / Local AI |
| • Responsive UI | • Rate Limiting | • Security-Focused Projects |
